Product Description

ASTM Food Grade Silver 0.006-0.2mm Aluminium Foil For Food Wrapping Household Foil

What aluminum foil is used for?

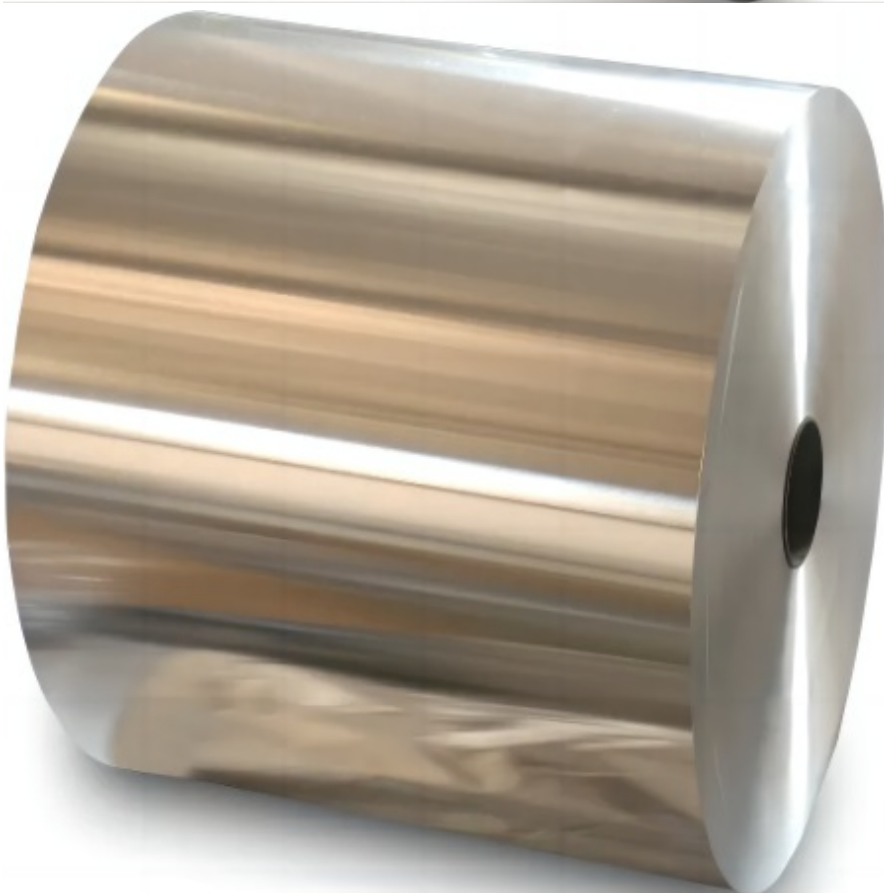

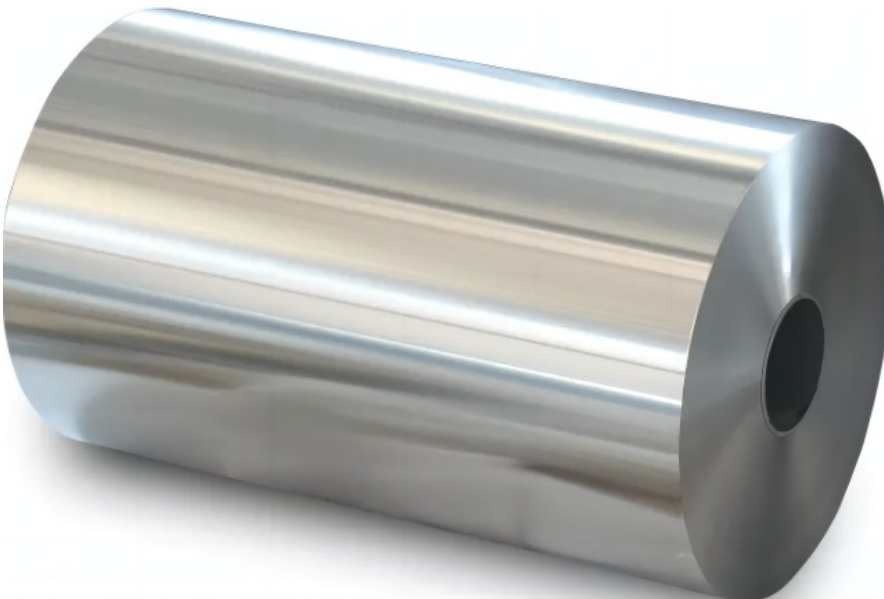

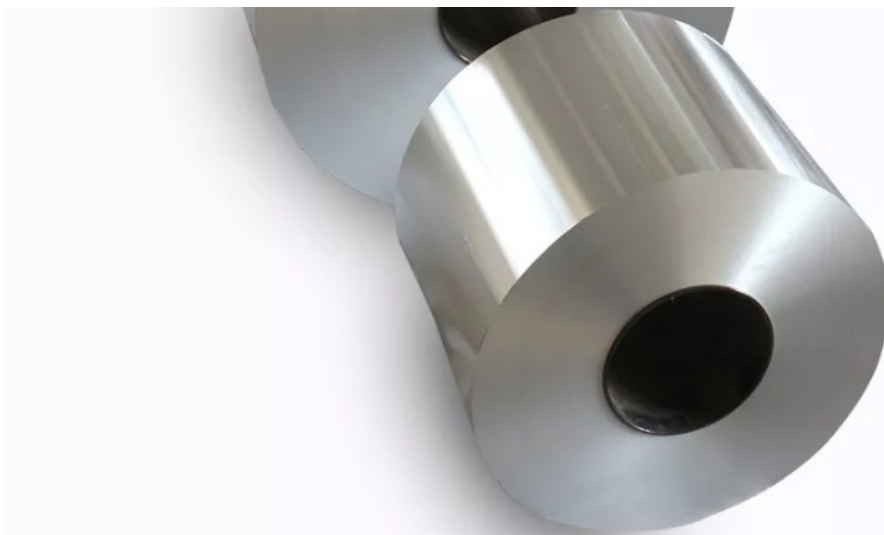

At home, people use aluminum foil for food storage, to cover baking surfaces and to wrap foods, such as meats, to prevent them from losing moisture while cooking. People may also use aluminum foil to wrap and protect more delicate foods, like vegetables, when grilling them.

Is aluminum foil better than plastic?

Aluminum foil keeps food colder than plastic wrap when food is removed from the refrigerator or freezer. In both cases, food must be wrapped tightly with no holes. Aluminum foil is also better for keeping in oxygen and moisture.
