Product Description

ASTM 6000 Series Silver Aluminium H Beam 10mm Used For Industry

What are aluminum beams used for?

Typical applications include structural components for commercial sites and residential homes such as rafters, awnings, trailers, overhead supports and walkways. Aluminum Association beam products tend to be more versatile as the thicker, straight-edged flanges allow for easier connections and fitting.

Where is I-beam used?

What are H Beams used for? H Beams are commonly used in the construction of buildings as well but also large trailers and bridges, among others. Due to their slightly different cross-section shape, thicker central web and wider flanges, H beams can bear larger loads than I beams.
