## Product Description

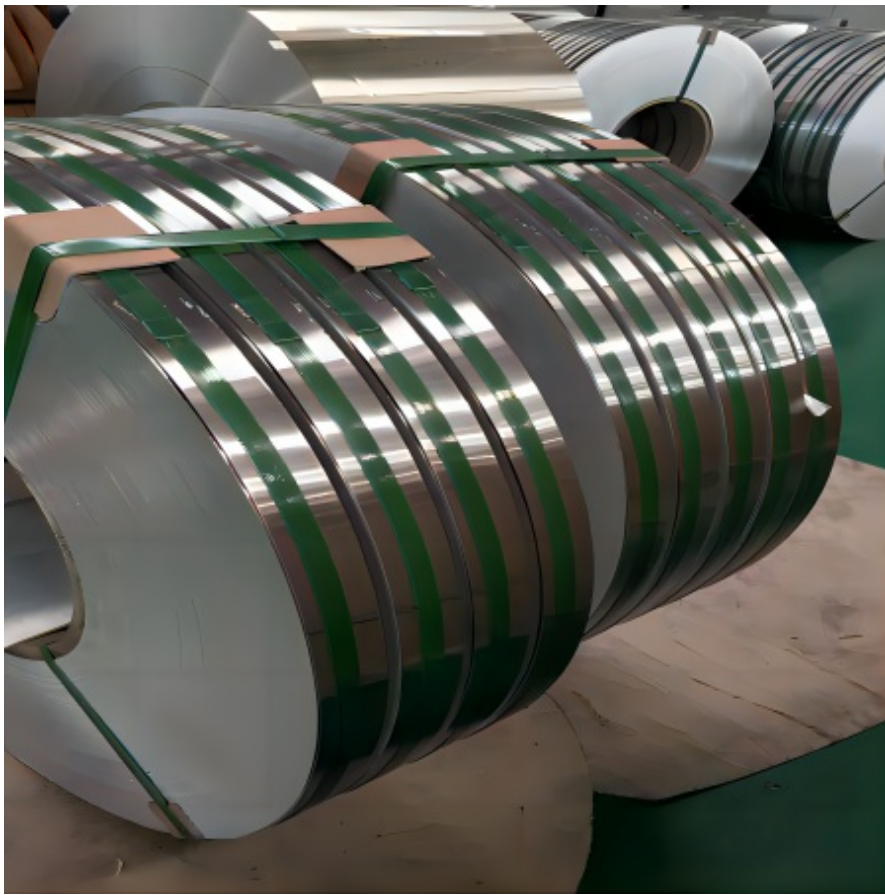

### ASTM 8011 Aluminium Alloy Strip 10mm Width For Bottle Cap Material

Series 3003 aluminum strip is a common product of aluminum manganese alloy series. Superior to manganese alloy element, this product has excellent anti-rust properties, also known as anti-rust aluminum strip. The strength is about 10% higher than 1100, and the formability, solubility and corrosion resistance are good. It is used for processing parts with good formability, high corrosion resistance and good weldability, or it requires both these properties and high strength than 1XXX series alloy, such as kitchenware, food and chemical products processing and storage device, liquid product transport tank, tank, All kinds of pressure vessels and pipe general utensils, heat sink, makeup plate, photocopier drum, ship materials processed by thin plate.
