Product Description

JIS 5052 Checkered Surface Aluminium Checkered Plate Uesd For Building 1500mm

5052 aluminum checker plate is processed from 5052 aluminum plate as raw material, which has good corrosion resistance and is usually used in special places.

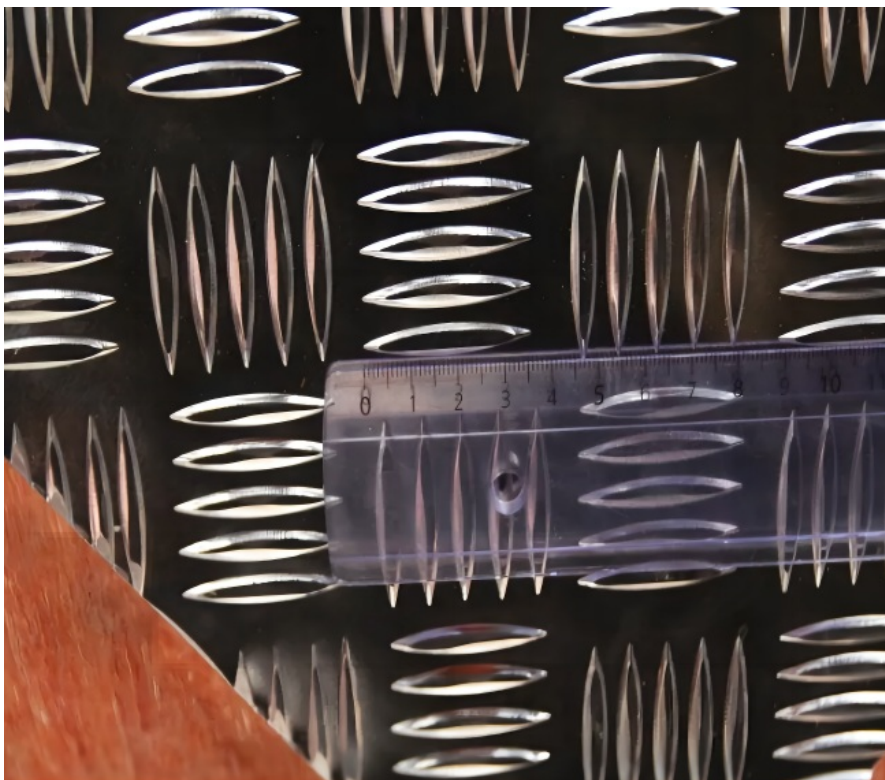

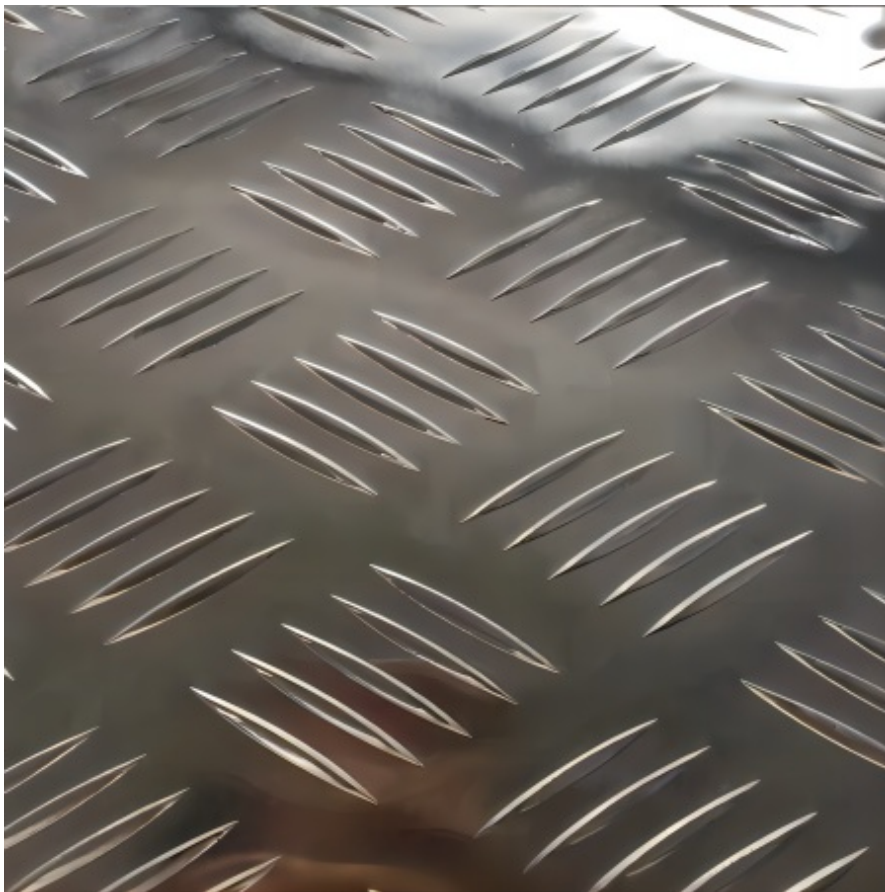

Such as ships, carriages and other humid environment, this kind of aluminum plate hardness is high, has a certain bearing capacity.

Is the most widely used rustproof aluminum, this alloy has high strength, especially fatigue resistance, high plasticity, and cannot be strengthened by heat treatment. It has good plasticity, good weldability, and poor machinability during semi-cold work hardening. However, it can be made into a bright surface or an ultra-wide board.
