Product Description

Aluminum checker plate is also called aluminum chequered plate. It is made from aluminum sheet. One side of the surface is embossed with <u>diamond plate</u> pattern. The different pattern can fit different environments and various usage. Aluminum checker plate is better for antirust and lighter than other materials, it can be used for many years and can retain high value after being replaced. This type of checkered plate is widely used as antiskid plate in both commercial and industrial flooring needs and also used in the vehicles, such as the ambulance and the firework truck.

FAQ

1.What is your paying terms?

Our usual paying terms are 30%TT as deposit and balance paid after seeing copy of bill of loading. For clients cooperated for more than one year, we accept 20% prepay. Beside we do business also under LC terms.

2. How long is your delivery time?

For the goods we have in stocks, we deliver the goods within 5 days. If it is a production order with volume not above 200tons, the delivery time will usually be within 20days after sealing contract. And the delivery time shall be slightly longer for order volume above 200tons.

3. Before cooperation we want a sample for inspecting of quality, is that okay?

We can provide a free sample for you shall sample value not above 30USD, you only need to pay the express charge. For a sample valued more than 30USD, the express charge and just one half of sample value is on the account of you, and we afford the other half.

4. Does your company accept third party inspection?

The answer is yes. Especially for new client, they have concern on product quality and quantity, so they authorized the third party inspection like SGS and BV several times to inspect the goods in stead of them, and we coordinated with their work well.
