Product Description

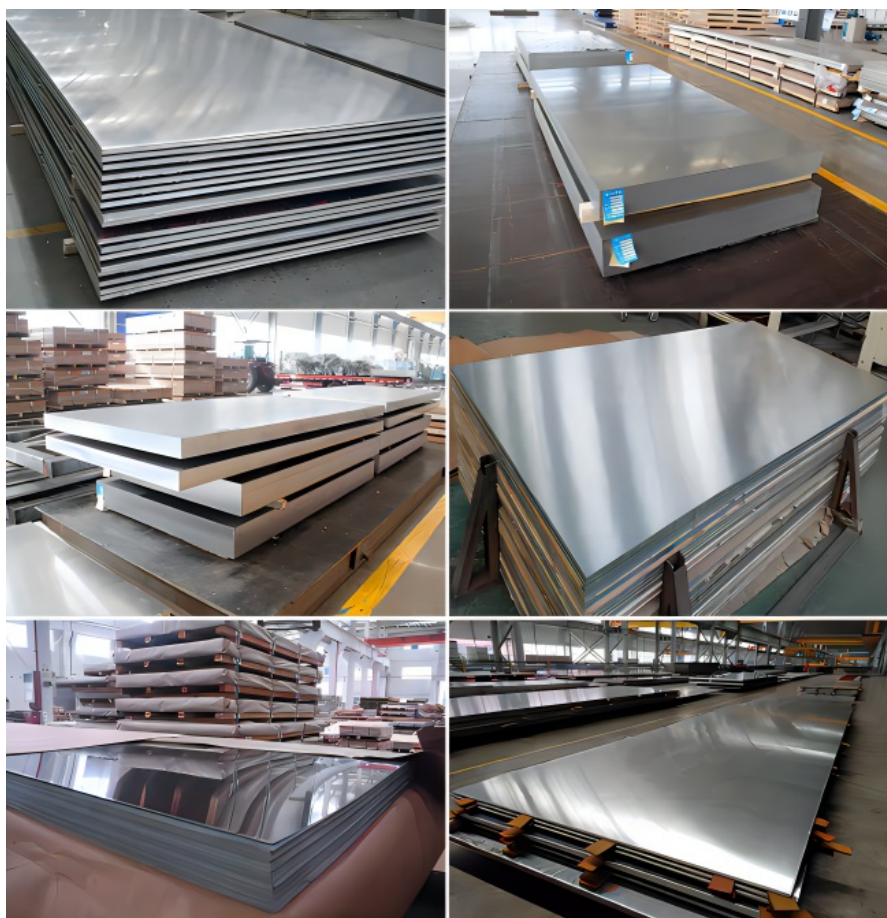

ASTM 1060 O Temper Aluminium Sheet Coated Alloy Plate 1200mm Length Cutting

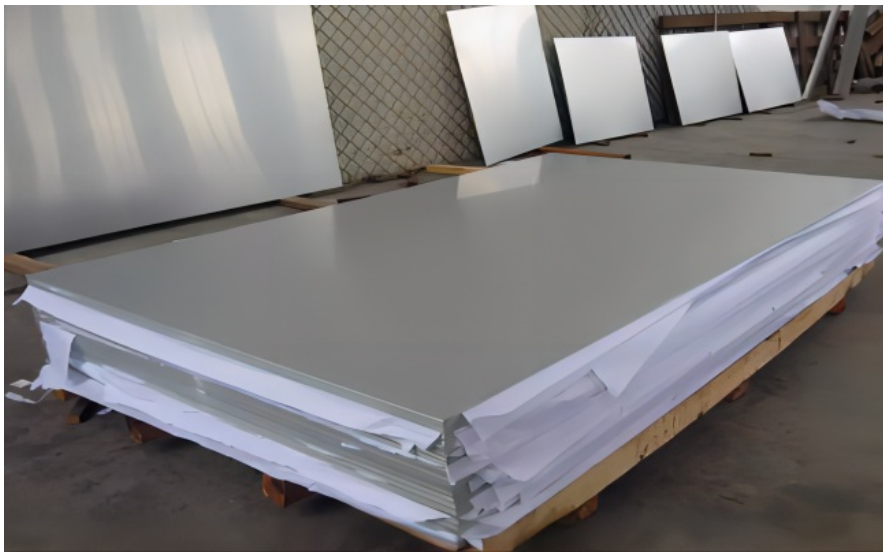

Product Description

1060 aluminum sheet is noted for its excellent welding characteristics and formability by cold or hot working with commercial techniques. It cannot be hardened by heat treatment but only from cold working. Tempers H12, H14, H16 and H18 are determined by the amount of cold working imparted into the alloy. Moreover, 1060 aluminium sheet has good corrosion resistance as well as poor machine-ability, and its machine-ability can be improved in harder (cold working) tempers, such as H16 and H18. For its features above, 1060 aluminum sheet has a vast application, such as electric and chemical equipment, railroad tank cars, etc.
