## Product Description

### ASTM 6075 Silver Aluminium I Beam 10mm Used For Window T3-T8 Temper

The use of I-type steel can effectively protect the environment, which is reflected in three aspects: first, compared with concrete, it can adopt dry construction, resulting in less noise and less dust; Second, due to the weight reduction, less soil extraction for foundation construction, small damage to land resources, in addition to a large reduction in the amount of concrete, reduce the amount of rock excavation, conducive to the protection of ecological environment; Third, after the service life of the building structure expires, the amount of solid garbage generated after the structure is dismantled is small.
