Product Description

ASTM Decorative 3003 Aluminum Woven Wire Mesh 1.6m For Decoration

What is metal mesh used for?

Flattened, or raised, expanded metal mesh is an extremely versatile material and used in multiple applications such as: Walkways, fencing, shelving & display units, security guards, sound attenuation, balustrades and building façades to name but a few.

Is aluminum wire stainless?

The primary differences between aluminum and stainless steel mesh have to do with weight and strength. Aluminum is substantially lighter than stainless steel. Some aluminum wire mesh materials can weigh 65% less than their stainless steel counterparts. Not surprisingly, it's also not as strong.
