## Product Description

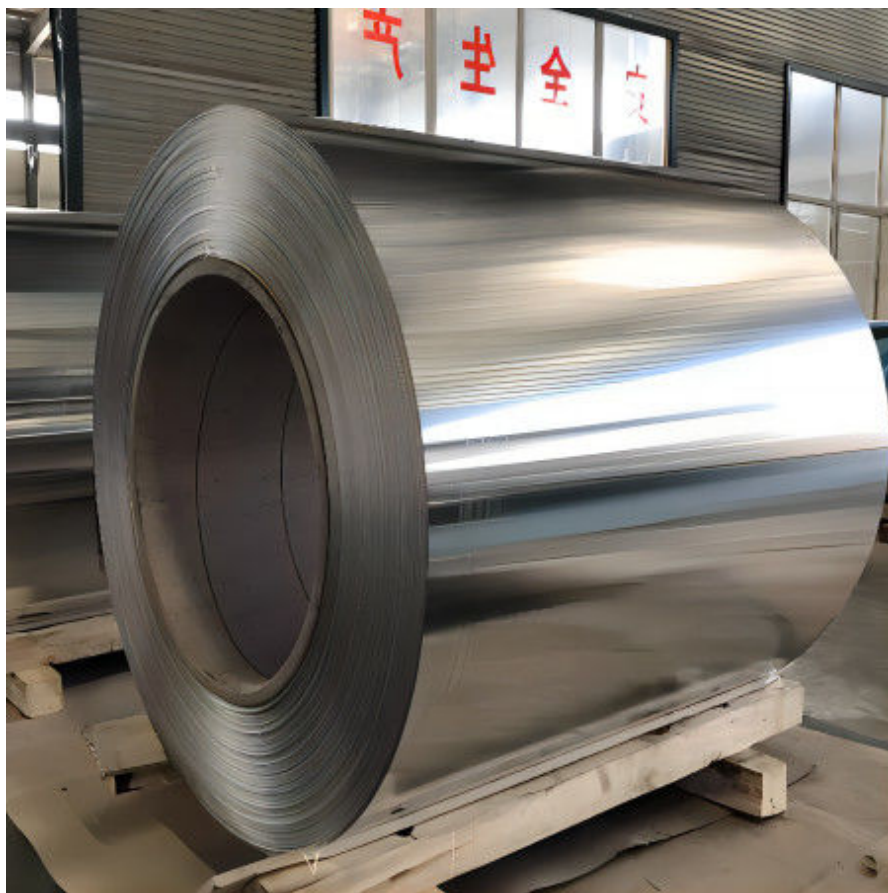

### ASTM 1100 Aluminum Coil Coated Surface For High Speed Sign 650mm Width

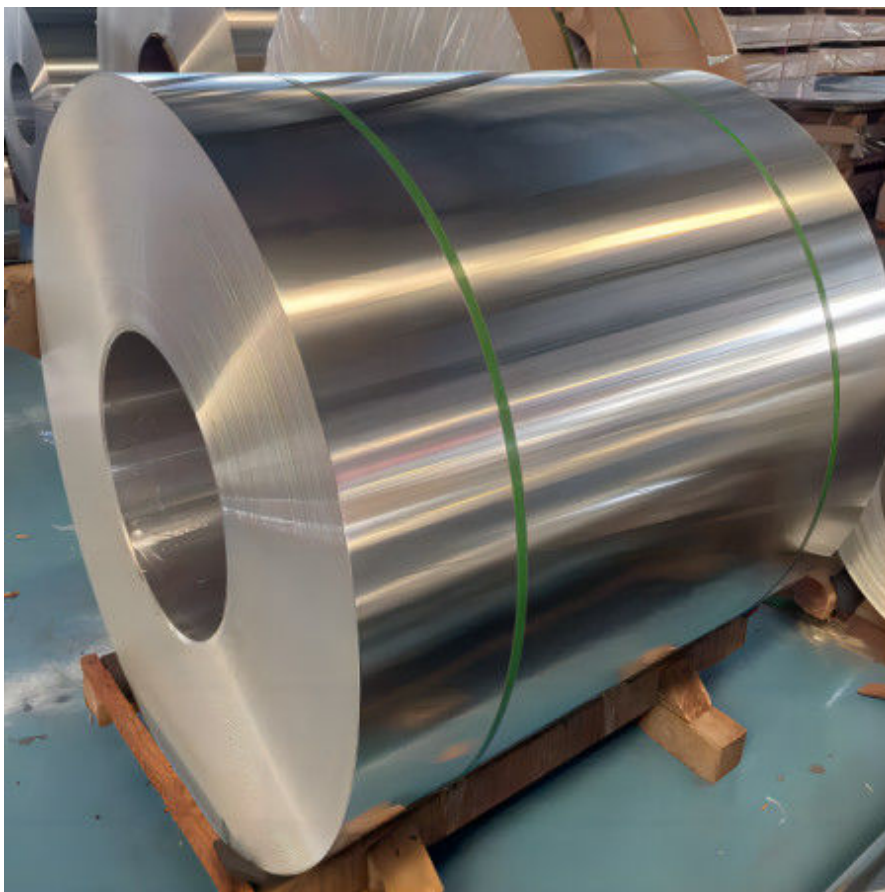

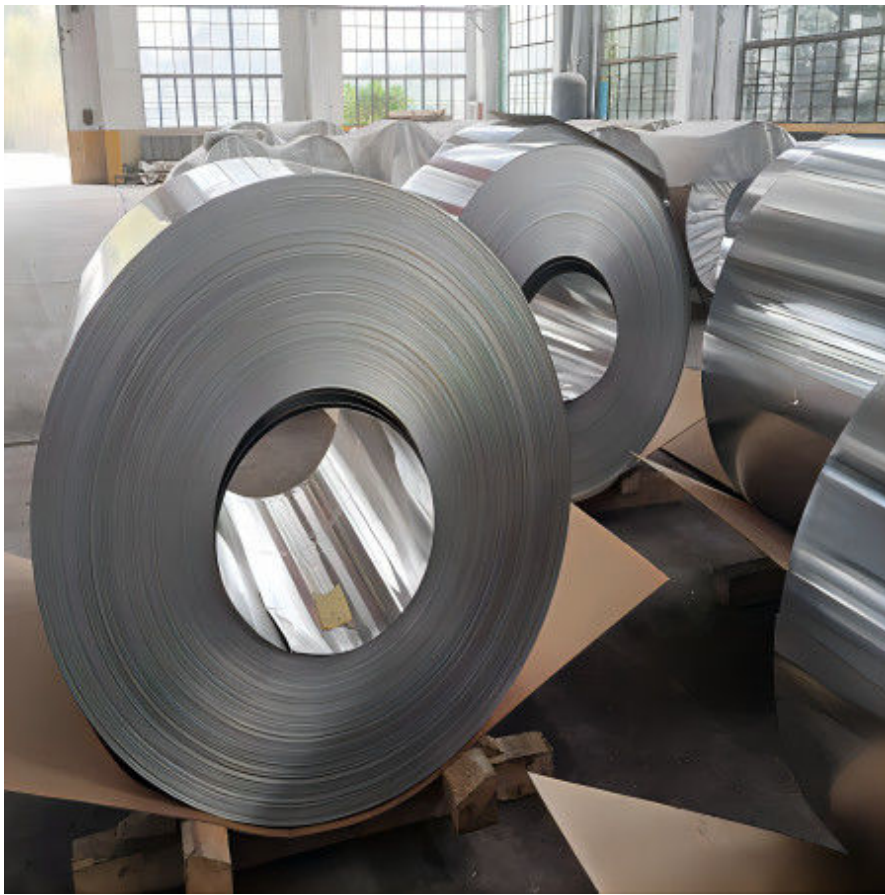

Aluminum coil has the characteristics of low density, long service life, beautiful appearance and so on. It is an indispensable product for pipeline insulation in power plants and chemical plants. In order to make better use of aluminum coil and prolong its service life, the storage environment of aluminum coil is more strict.

1100 aluminum coil belongs to the aluminum series, its strength is relatively low, has excellent ductility, formability, weldability and corrosion resistance; After anodizing, corrosion resistance can be further improved and beautiful surface can be obtained. But it cannot be strengthened by heat treatment.
