Details

It is used for welding aluminum alloy in shipbuilding, offshore platform, railway locomotive and automobile manufacturing industry.

THS-AL5356 is aluminum magnesium alloy welding wire, which is used to weld aluminum magnesium alloy with high magnesium content. The welding wire has high strength, good malleability and excellent seawater corrosion resistance.

1. Before welding, the oxide, oil stain, moisture and other impurities on the welding joint and welding wire must be removed.
2. During welding, the base plate can be used to hold the molten metal to ensure the formation of the weld.
3. When oxyacetylene gas welding, aluminum gas welding flux must be used together.
