Product Description

ASTM 3003 Embossed Surface Aluminium Checkered Plate For Transportation 600mm

The rigid polyurethane foam insulation layer used in the pattern aluminum plate (3003 aluminum plate) has low thermal conductivity and can store heat well to achieve the effect of heat preservation. The surface of the aluminum plate is painted with fluorocarbon polymer resin, which can make the surface of the aluminum plate have good corrosion resistance, but also have good resistance to ultraviolet erosion, can not fade for a long time. And fluorocarbon polymer resin better fire resistance, even after burning will not be burned.
