

Astm AISI JIS Aluminium Disc 2mm 3mm 5mm Round Large Aluminum Discs 1050 1060 1100 3003 5052

Our Product Introduction

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: LIANZHONG
- Certification: ISO9001
- Model Number: 1100/1050/1060/1070/1200/1350
3003/3004/3104/3005/3105 5005/5052/5454
- Minimum Order Quantity: 3ton
- Price: Negotiable
- Packaging Details: Exporting package/wooden box package etc
- Delivery Time: 3-15 days
- Payment Terms: L/C, T/T, Western Union
- Supply Ability: 20000 Ton/Tons per Month

Product Specification

- Name: Aluminium Disc 2.0mm 3.0mm 5.0mm Thick
- Diameter: 60mm-1500mm
- Process: Cold Rolling(CC) and Hot Rolling(DC)
- Thickness: 0.2-200mm Customized
- Certification: ISO9001:2000
- Standard: GB/T3880 ASTM B209
- Highlight: **large aluminum discs 3mm,
AISI circle aluminum,
5052 aluminum round disc**

Product Description

ASTM AISI JIS Aluminium Disc 2.0mm 3.0mm 5.0mm Thick Cooker 1050 1060 1100 3003 5052

Aluminum circle is a kind of product obtained by deep processing of aluminum plate. Now the demand of foreign market is relatively large, and most of the aluminum circles produced in China are exported to all over the world. Aluminum wafer surface bright, beautiful, can be shaped and surface treatment. Generally speaking, the common aluminum circle is mainly 1050/1060/1100/3003/5052 with HO or semi-hard temper state. This treatment will not crack in the punching and spinning processing.

Aluminum circle/disc/disk	
Aluminum Alloy	1050,1060,1070,3003,3004,5052,etc
Temper	O,H12,H14,H18,H24,H32,etc
Thickness(mm)	0.3-8.0
Diameter(mm)	80-1500
Material process	Cold rolling(CC)and Hot rolling(DC)
	DC for cookware with good deep drawing and spinning
Customerize size	Size can be produced as per clients requirement
Surface	Mill finish,or color coated or anodized
Quality standard	ASTM-B209. EN573-1, GB/T3880.1-2012
MOQ	5 Tons
Payment Terms	T/T or L/C at sight
Delivery time	within 30 days after receipt deposit and L/C
Application	Pressure container,cookware,high pressure,furniture,etc
Packing	Standard export worthy wooden pallets

Standard series	Description	Application	Feature
	1050 1060 1070 1100 1235 representative series aluminum plate is also known as pure aluminum, in the series in 1000 series belongs to all the alumina quantity of a maximum number of series. Purity can achieve 99.00% above.	Utensil, decoration, Reflecting plate, printing plate, heatproof plate, cookware	Easy to process and weld, resistant to rust, high, conductivity of electricity and heat, low strength
	3000 series aluminum represents 3003 3004,3005, 3A21 primarily. And can be called in the 3000 series aluminum antirust aluminum production process more outstanding. The 3000 series aluminum plate is by manganese as the main component. Content at 1.0-1.5 between. Is a rust-proof function better series. Conventional application in the air conditioning, the refrigerator, such as car in damp environment	Utensil(F/P, inside of rice cooker), aluminum can,material for interior and exterior of building,chemical equipment,Cellular Phone	20% higher strength than the 1100 series, easily welded and brazed, good antirust,ability Non-heat treatable
	5000 series representatives 5052 5005 5083,5754. The 5000 series aluminum alloy aluminum belong to the more commonly used series, the main elements for magnesium, with magnesium in the amount between 3-5%. And can be called aluminum magnesium alloy. Key features for low density, high tensile strength, elongation rate is high. In the same area under the weight of the magnesium alloy aluminum less than other series.	Ship board heatproof apparatus, material for interior and exterior of building, Parts of Electronic tools. Automobile Components	Excellent corrosion resistance andweld ability together with Easy to process and weld and superior hardness &heatproof Can be anodized for increased corrosion resistance

6000 series represents 6061 mainly contain magnesium and silicon of two elements, so focused on the 4000 series and the advantages of the 5000 series 6061 is a cold treatment aluminum forging products, apply to fight against corrosion, oxidizing demanding applications.	IT equipment & facility, Mould material, motor material, automatic line, machine & plant etc	Easy to process , good corrosion resistance, high toughness and processed without distortion after heat-treatable, superior surface treatment
7000 aluminum alloy is another common alloy, wide variety. It contains zinc and magnesium. The best strength in the common aluminum alloy is 7075 alloy, but it can't be welded, and its corrosion resistance is rather poor, many manufacturing parts with CNC cutting is 7075 alloy.	The aerospace industry & High strength accessories	7000 series is high tensile to process with special alloy

Product Details

Processing:

Packing and Shippment

Package	Standard export seaworthy package,suit for all kinds of transport, or as required.
	Water-proof Paper + Edge protection + Wooden Pallets
Bulk Size	Any size
Loading Port	Tianjin, Qingdao Port or any China Seaport
Container	1*20ft container load Max. 25 Ton, Max. length 5.8m
	1*40ft container load Max. 25 Ton, Max. Length 11.8m
Delivery Time	7-15 days or according to the order's quantity

Certification

Why Choose Us

WHY CHOOSE US?

 <p>Good After-Sale Service</p>	 <p>Free Samples Service</p>
 <p>Shipping Supporting Service</p>	 <p>Support OEM & ODM</p>
