Product Description

H32 5083 Aluminum Sheet 1.6mm Alloy Plate Embossed Mirror Finish For Construction

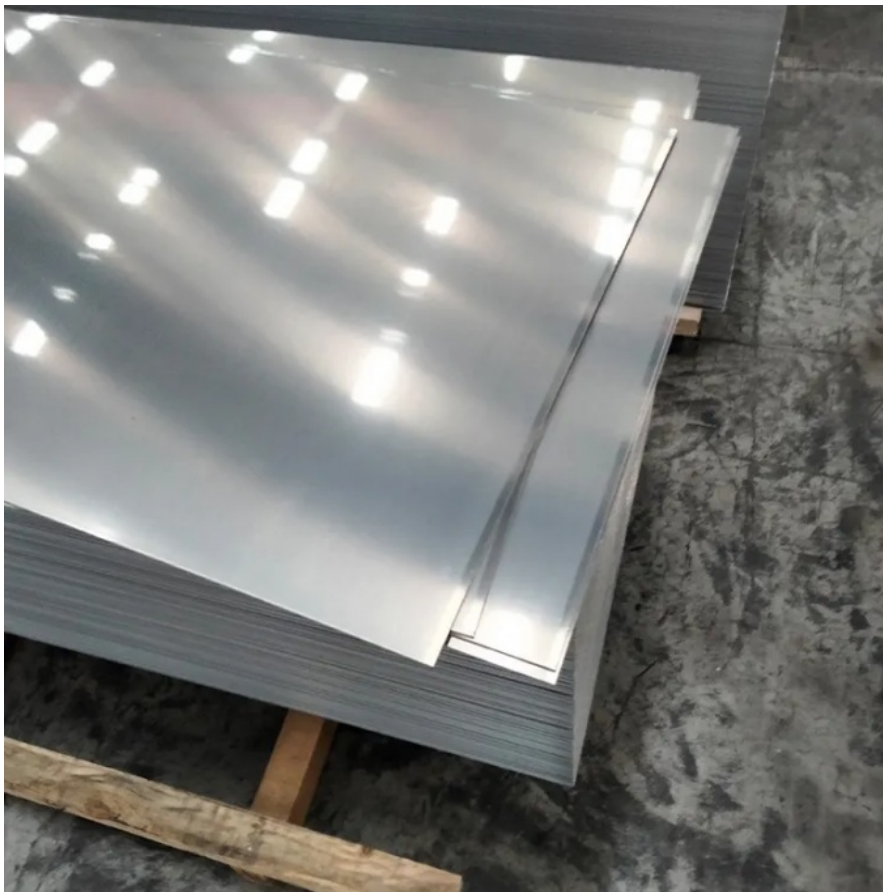

Product Description

The production of aluminum sheet metal is carried out when aluminum material is pressed and rolled under high pressure. Aluminum sheets are generally lightweight but also possess sufficient strength to be useful in numerous industry applications. Aluminum metal sheet is exceptionally versatile and is easy to manufacture, making it among the most popular of the metal sheets available on the market.

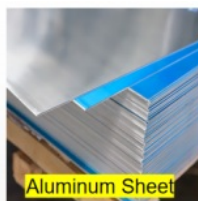

As a metal that is useful in so many industries, you can actually find this metal almost everywhere. It is commonly used for cookware and for packaging in the food and beverage industry. Aluminum sheet is also often used for the bodies and framing of motor vehicles. This metal sheet is also often used in the building and construction industry for items that include sidings, drains, and much more.
