Product Description

ASTM 6061 Aluminum 30-1600mm Width Used For Industrial Decoration

6061 has excellent processing performance, good corrosion resistance, high toughness and no deformation after processing, easy coloring film, excellent oxidation effect and other excellent characteristics. It has good plasticity and excellent corrosion resistance. Especially no stress corrosion cracking tendency, its excellent weldability, corrosion resistance and cold workability, is a wide range of use. A very promising alloy. Can be anodized coloring, can also be painted on enamel, suitable for building decoration material. It contains a small amount of Cu, so the strength is higher than 6063, but the quenching sensitivity is also higher than 6063, after extrusion can not achieve wind quenching, need to re solution treatment and quenching aging, to obtain a higher strength.
