## Product Description

### Chinalco 7075 T3-T8 Aluminum Alloy Sheet 100mm~2500mm Width For Airplane Structures

7075 is an aluminum alloy with zinc as the main alloying element, but sometimes a small amount of magnesium and copper are added. The superdural alloy is containing zinc, lead, magnesium and copper alloy, close to the hardness of steel, can be strengthened by heat treatment, is a high strength, heat treatment alloy, corrosion resistance is ordinary, good mechanical properties. Aluminum 7075 is a cold-treated forged alloy with superior strength over mild steel. 7075 aluminum alloy is one of the strongest alloys commercially available. General corrosion resistance, good mechanical properties and anode reaction. The fine grain makes the deep drilling performance better, the tool wear resistance is enhanced, and the thread rolling is different from the weight.
