## Product Description

### ASTM 7020 7022 7050 7075 Aluminum Tube SCH40 SCH60 Wall Thickness Customized Size For Decoration

#### Product Introduction

Advantages of aluminum tubes:

1. Advantages of welding technology: The welding technology of thin-walled copper-aluminum tubes suitable for industrial production is known as a world-class problem and is the key technology for replacing copper with aluminum for connecting tubes of air conditioners.
2. Advantages of service life: From the perspective of the inner wall of the aluminum tube, since the refrigerant does not contain moisture, the inner wall of the copper-aluminum connecting tube will not corrode.
3. Energy-saving advantages: The connection pipeline between the indoor unit and the outdoor unit of the air conditioner, the lower the heat transfer efficiency, the more energy-saving, or the better the thermal insulation effect, the more power-saving.
4. Excellent bending performance, easy to install and move.
