Product Description

2024 H112 O Temper Aluminum Sheet 4 x 8 Customized Length 1060 1050 Polished Surface

Product Description

Aluminum sheets and plates are lightweight and flat or formed with a surface texture that helps increase traction and overall rigidity. Standard aluminum sheets are also known as flat stock. They are solid and provide a good strength-to-weight ratio. Aluminum expanded and perforated sheets have openings that allow light, air, and water to pass through. Aluminum textured sheets and plates have a raised surface for an improved look and to increase surface traction.
