Product Description:

5052 is the strongest non-heat treatable sheet and plate in common use. Versatility and strong value make it one of the most serviceable alloys.

1. Alloyed with magnesium, 5052 aluminum can be [anodized](#). It shows good welding characteristics, and demonstrates moderate-to-good strength. It has good drawing properties and a high rate of work hardening.

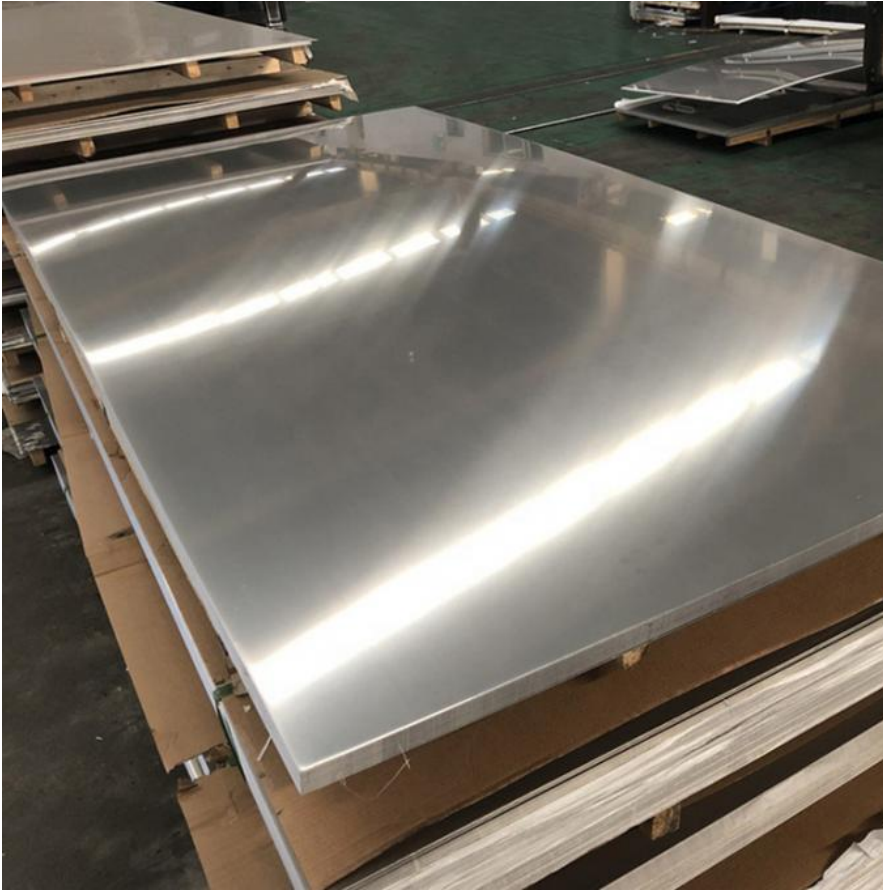

2. 5052 aluminum is resistant to saltwater corrosion, making it appropriate for many marine applications.

3. Applications range from fuel tanks to marine applications, fans, fan blades, fencing, small boats, truck trailers, architectural panels, and some non-critical automotive parts.
