Product Description

Grade 7075 T6 Aluminium Flat Bar 8mm 180mm Width Alloy Extrusion Profile Silver Polished Surface

Product Description

Flat bars are commonly made through the process of extrusion. During this process, the aluminum is pushed through a die that is under pressure. As the material is pushed through, the desired shape is made. The shape is cooled, and other processes, including stretching, milling, and cutting, are used to achieve the final product.
