

## 1060 H24 3003 Aluminium Coil 0.3mm 0.5mm Thick Color Coated Surface For Roofing Sheet

### Our Product Introduction

For more products please visit us on [aluminium-sheetcoil.com](http://aluminium-sheetcoil.com)

#### Basic Information

- Place of Origin: Jiangsu China
- Brand Name: Chinalco
- Certification: ASTM GB EN
- Model Number: 1050 1060 2024 5052 6061 6063 6082 7075 8011
- Minimum Order Quantity: 1 TON
- Price: Negotiable
- Packaging Details: Standard Seaworthy Packing
- Delivery Time: 7-10 days, or depends on the specific quantity
- Payment Terms: T/T,L/C
- Supply Ability: 20000tons/year

#### Product Specification

- Temper: O - H112
- Material: Aluminium
- Surface Treatment: Coated, Embossed, Anodized, Etc.
- Width: 100-1800mm Or As Required
- Hardness: ≤90HB
- Processing Service: Decoiling, Punching, Cutting
- Thickness: 0.2-4mm Or As Required
- Packing: Standard Export Packing
- Highlight: **h24 3003 aluminum coil,**  
**3003 aluminum coil 0.3mm**

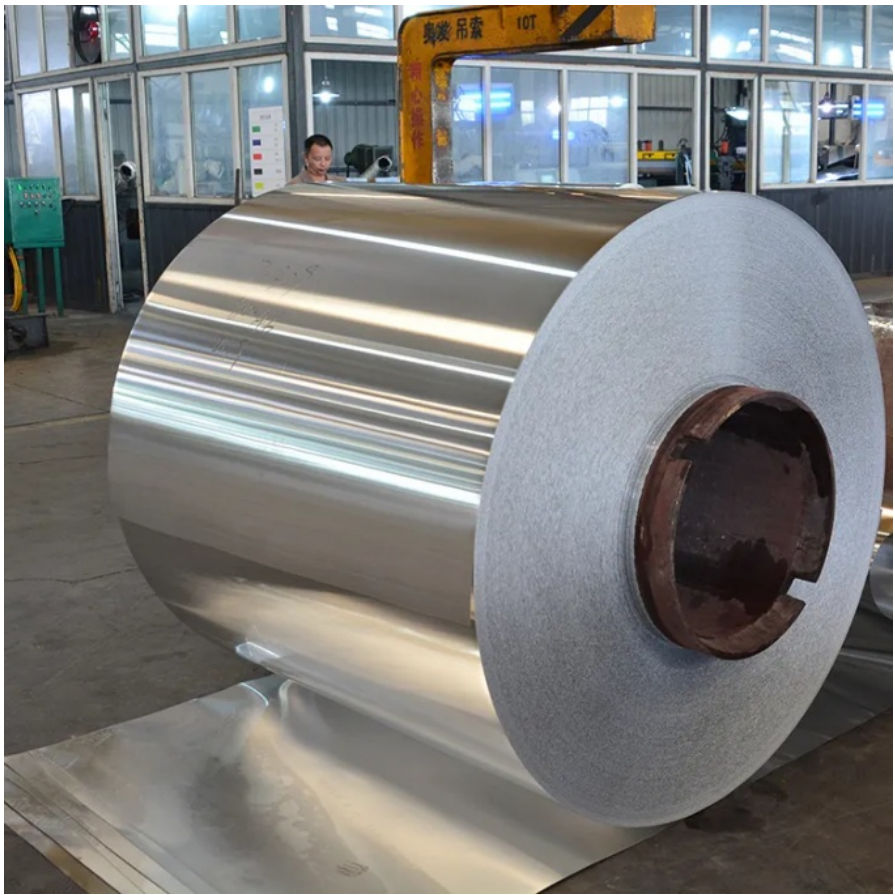

### Product Description:

Aluminium Coil is a thin, flat sheet of aluminum that is used in a variety of industries such as construction, transportation, and manufacturing. It is a versatile and durable material that is known for its strength, lightweight, and corrosion resistance. There are various types of aluminium coils available in the market, but our aluminium coil stands out for its high quality and excellent performance.

We offer a variety of surface treatments for our Aluminium Coil, including coated, embossed, and anodized. Our coated Aluminium Coil is coated with a protective layer that enhances its durability and resistance to weather and corrosion. Our embossed Aluminium Coil has a textured surface that adds a decorative element to the finished product. Our anodized Aluminium Coil is treated with an anodizing process that increases its corrosion resistance and provides a smooth and attractive finish.

Width	1219mm/1250mm/1500mm/2500mm/3000mm/as you required
Thickness	0.05-16mm or as required
Weight	3-8Tons/Coil
Standard	AISI,ASTM,DIN,JIS,GB ,JIS,SUS,EN,etc
MOQ	1Ton
Technique	Hot rolled/Cold rolled
Surface Treatment	Bright,polished,hair line,brush,sand blast,checkered,embossed,etching,etc
Sample	Free and available
Material	1000 2000 3000 4000 5000 6000 7000 8000 Series
Application	Construction,decoration,hardware,electric appliances,machinery and other industrial and civil purposes,such as electronic capacitor,composite cooker, refrigerator, computer, casting,telecommunication,equipment,lamp shade,air conditioner,cosmetics cover and so on.Or it can be made as customers' requirement.
Shipment Time	7-10days after deposit according to your requirements
Capacity	20000Tons/Month

### Detailed Photo:

**Color Surface:**

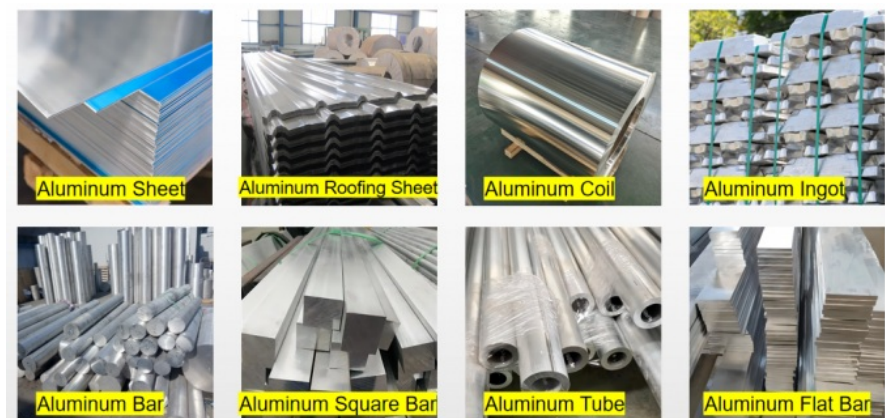

RAL 1013	RAL 1015	RAL 2002	RAL 2005	RAL 3005	RAL 3013
RAL 5010	RAL 5012	RAL 5015	RAL 5017	RAL 6005	RAL 7011
RAL 7021	RAL 7035	RAL 8004	RAL 8014	RAL 8017	RAL 9002
RAL 9003	RAL 9006	RAL 9010	RAL 9011	RAL 9016	RAL 9017

**Features:**

Standard	Description	Application	Feature
	1050 1060 1070 1100 1235 representative series aluminum plate is also known as pure aluminum, in the series in 1000 series belongs to all the alumina quantity of a maximum number of series. Purity can achieve 99.00% above.	Utensil, decoration, Reflecting plate, printing plate, heatproof plate, cookware	Easy to process and weld, resistant to rust, high, conductivity of electricity and heat, low strength

3000 series	3000 series aluminum represents 3003 3004,3005, 3A21 primarily. And can be called in the 3000 series aluminum antirust aluminum production process more outstanding. The 3000 series aluminum plate is by manganese as the main component. Content at 1.0-1.5 between. Is a rust-proof function better series. Conventional application in the air conditioning, the refrigerator, such as car in damp environment	Utensil(F/P, inside of rice cooker), aluminum can,material for interior and exterior of building,chemical equipment,Cellular Phone	20% higher strength than the 1100 series, easily welded and brazed, good antirust,ability Non-heat treatable
5000 series	5000 series representatives 5052 5005 5083,5754. The 5000 series aluminum alloy aluminum belong to the more commonly used series, the main elements for magnesium, with magnesium in the amount between 3-5%. And can be called aluminum magnesium alloy. Key features for low density, high tensile strength, elongation rate is high. In the same area under the weight of the magnesium alloy aluminum less than other series.	Ship board heatproof apparatus, material for interior and exterior of building, Parts of Electronic tools. Automobile Components	Excellent corrosion resistance andweld ability together with Easy to process and weld and superior hardness &heatproof Can be anodized for increased corrosion resistance
6000 series	6000 series represents 6061 mainly contain magnesium and silicon of two elements, so focused on the 4000 series and the advantages of the 5000 series 6061 is a cold treatment aluminum forging products, apply to fight against corrosion, oxidizing demanding applications.	IT equipment & facility, Mould material, motor material, automatic line, machine & plant etc	Easy to process , good corrosion resistance, high toughness and processed without distortion after heat-treatable, superior surface treatment

### Recommend Products:

### Applications:

Our Aluminium Coil is widely used in various industries such as construction, transportation, packaging, and decoration. It is an essential

material in the production of building facades, roofing, gutters, and many other construction projects. It is also used in the manufacturing of vehicles, electrical wiring, and household appliances. The versatility of our Aluminium Coil makes it a popular choice in many applications.

**Packing and Shipping:**

Our Aluminium Coil is carefully packaged to ensure safe delivery to our customers. Each coil is wrapped in protective material and then placed into sturdy wooden crates for added protection during transportation. We offer flexible packaging options to meet the specific needs of our customers. Coils can be packaged individually or in bundles depending on the size and quantity ordered.

**The Sample Delivery**

**FAQ:**

Q1: Do you offer free samples?

A: Sure, we are glad to send you free samples for your evaluation. But currently we need you to kindly pay the delivery charge on your side if you'd like to have our samples.

Q2: How long does your delivery time take?

A: In general, our delivery time is within 7 days, and may be longer if the quantity is extremely large or special circumstances occur.

Q3: Can I go to your factory to visit?

A: Of course, we welcome customers from all over the world to visit our factory.
