Applications:

Aluminium coils have a wide range of applications and are suitable for various industries. Some of the common uses of our aluminium coils include:

- Roofing and cladding for buildings
- Manufacturing of household appliances
- Automotive industry for body panels and structures
- Manufacturing of heat exchangers and radiators
- Electrical and electronic industry for cables and wires
- Food and beverage packaging
- Transportation industry for trailers and truck bodies
- Marine industry for boat hulls and structures
- Furniture manufacturing

1)1000 series industrial aluminum used in construction, packaging, air conditioning, refrigerators, solar energy, cosmetics and other industries

2)1000 series industrial pure aluminum used in power plants, chemical petrochemical plants, etc.

3)3000 series aluminum-manganese alloy is often used in air conditioners, refrigerators, cars in humid environments, etc.

4)5000 Series aluminum-magnesium alloys are commonly used in aerospace applications such as aircraft fuel tanks. Widely used in traditional industries

Packing and Shipping:

The Aluminium Coil is carefully packaged to ensure safe delivery to our customers. The packaging process includes the following steps:

First, the Aluminium Coil is wrapped in protective material to prevent any scratches or damage during transportation.

Next, the coil is placed in a sturdy wooden crate to provide additional protection.

The crate is then secured with straps and labeled with the product information and shipping details.

Finally, the crate is loaded onto a truck or container for shipping.
