Applications:

Due to its unique five bar pattern, our Aluminum Checkered Plate is commonly used as an anti-slip plate for flooring, stairs, and ramps. It is also suitable for decoration purposes, such as wall cladding and ceiling panels. In the construction industry, it is used for roofing, siding, and insulation. Additionally, it is widely used in transportation, such as truck beds, trailers, and marine vessels.

Packing and Shipping:

The Aluminum Checkered Plate is first wrapped in protective materials to prevent any damage during transportation. It is then placed in a sturdy wooden crate or pallet to provide additional protection.

We also offer customized packaging options to meet specific customer requirements. This includes adding labels, logos, and other markings as requested.
