Product Description

Flat 1060 3003 5052 Alloy Aluminum Sheet Construction Decoration Malleable High Strength

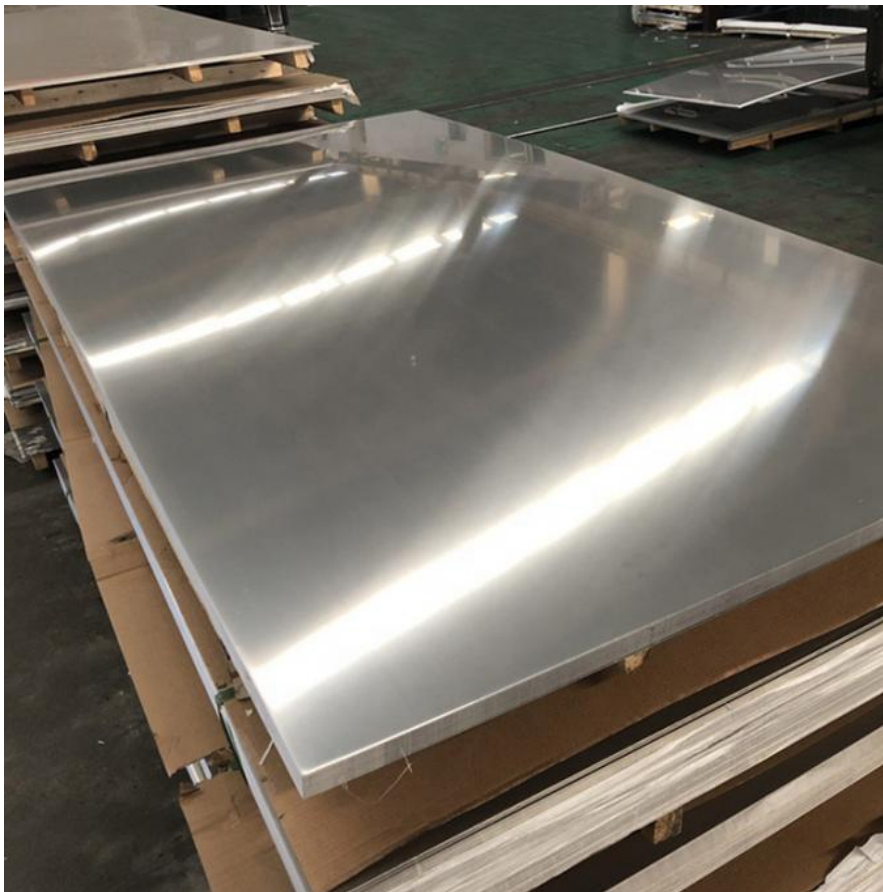

Product Description

Aluminum sheet metal comes in a variety of thicknesses and weights in many different grades. Ryerson offers heat treatable aluminum sheet grades, like the popular 6061 aluminum alloy, that can be used for commercial applications that require strength, corrosion resistance and machinability, as well as non-heat treatable grades when formability and weldability are priorities. Popular applications for aluminum sheet include fuel tanks, roofing, boat hulls and automobile parts. Available grades include 1100, 3003, 5052, 5086, 5454 and 6061.
