Product Description

Marine Grade 5052 H32 Aluminium Checker Plate Two Bars Pattern Embossing For Truck Box

Product Description

Aluminum checker plate is also called aluminum chequered plate. It is made from aluminum sheet. One side of the surface is embossed with diamond plate pattern. The different pattern can fit different environments and various usage. Aluminum checker plate is better for antirust and lighter than other materials, it can be used for many years and can retain high value after being replaced. This type of checkered plate is widely used as antiskid plate in both commercial and industrial flooring needs and also used in the vehicles, such as the ambulance and the firework truck.
