Product Description

1/6 Sublimation Alloy Aluminium Plate Sheet 3mm 5083 6061 T6 T4 Polish

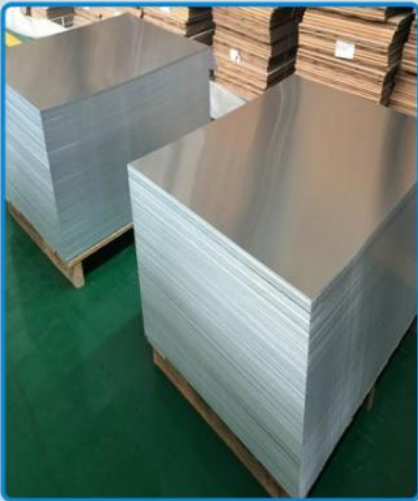

Product Description

The manufacturing process of repeatedly scraping the aluminum plate out of the line with sandpaper. The main process of the process is divided into three parts: deesterification, sand mill and water washing. In the aluminum sheet drawing process, the special film technology after anodizing can make a film layer containing the metal component on the surface of the aluminum sheet, and clearly show every fine wire mark, so that the metal matte shines with fine hair. Silky sheen.

Product Details

Aluminum Sheet

Features

1. Using high-quality aluminum raw materials, Good processing performance, no rust, High toughness and refuses to cut corners.
2. The product adopts excellent spraying technology and chemical technology polishing and edge grinding, The surface treatment is flat and smooth.
3. Acid-resistant, corrosion-resistant, waterproof, Rust resistance, wear resistance, Can extend the service life of metal parts, etc.

4.Any size can be provided according to drawings and samples, according to customer needs Custom processing

5.Free aluminum material samples are provided. No size specified, Contact customer service to receive
