Product Description

Extruded Round Aluminium Rod Solid Bar 2024 5052 5083 T6 Silver Color ISO Certificate

Product Description

Aluminum rod is a metal material widely used in industry and is popular for its light weight, corrosion resistance and good electrical conductivity. This product is made of high-quality aluminum, with smooth surface and precise dimensions, and can meet various high-precision processing needs. Aluminum rods are widely used in aviation, automobiles, construction and other fields, providing a solid material foundation for the development of modern industry. Choosing high-quality aluminum rods will bring higher efficiency and longer service life to your production.
