Product Description

ASTM B209 Aluminium Sheet 0.5mm 4X8FT 1060 H18 Pure Plate Laser Cutting For Building

Product Description

The use of aluminium alloys instead of welding of steel plate materials, the weight of the structure can be reduced by more than 50 per cent. Aluminium alloy density is low, but the strength is relatively high, close to or more than high-quality steel, good plasticity, can be processed into a variety of profiles, with excellent electrical conductivity, thermal conductivity and corrosion resistance, widely used in the industry, the use of second only to steel.
