Product Description

5754 5mm Thick Gauge Anodized Oxidized Matte Silver Aluminium Coil For Decorative Nameplates And Signage

Product Description

5754 aluminum coil is an Al Mg series rust proof aluminum with balanced performance, and its core advantages are good corrosion resistance and weldability. Its hardness is not fixed and depends on its state (O, H22, H24, H34, H38, etc.). The most commonly used state is H24/H34 (semi hard state), which can balance strength, formability, and stress corrosion resistance well.

When choosing, it is important to clarify your specific requirements for material strength, formability, and corrosion resistance in order to determine the most suitable alloy state.
