Product Description

5052 Aluminum Wire 1mm 2mm 3mm High Strength With Bending Processing Service Included

5052 aluminum wire is an ideal material for structural components and fasteners, rather than a conductive material. When your application scenario requires a metal wire with high strength, excellent corrosion resistance, and easy welding or forming, 5052 is one of the most common choices. If you need to make rivets, springs, or metal parts in corrosive environments, 5052 aluminum wire is your first choice.
