## Product Description

### 0.5mm 0.6mm 0.8mm 99% Pure 6063 Aluminium Wire Powder Coating For Architectural Decoration

6063 is a heat treated reinforced aluminum alloy wire known for its excellent extrusion performance, good surface treatment performance, and moderate strength. It is rarely used as a "wire" and is mainly used to manufacture rivets, fasteners, and various precision small parts that require extrusion molding. Excellent compressibility is its most prominent feature.

Item	Aluminium Wire
