## Product Description

### Customized Size 3003 3004 Aluminum Strip 3mm 4mm Thickness For Truck Box Board

#### Product Introduction

3003 and 3004 are both Al Mn alloys with excellent rust resistance, good formability, and moderate strength. 3004 adds more magnesium (Mg) to 3003, making it stronger and especially suitable for situations that require higher pressure. 3mm and 4mm belong to medium thickness specifications, which have good strength and processability, and are commonly used in structural and durability demanding fields.
