Product Description

Precision Tolerance $\pm 0.02\text{mm}$ - $\pm 0.05\text{mm}$ Aluminium Coil The Ultimate Choice for H12 Temper

Product Description

The Aluminium Coil is a versatile product that can be used in various industries due to its excellent properties and wide range of applications. This steel coil is coated with an Ace Treatment, making it more durable and resistant to corrosion, enhancing its longevity and performance. The Aluminium Coil is an Is Alloy type, ensuring high quality and strength for different projects and applications.

With a variety of tempers available including O, H12, H14, H16, H18, H22, H24, H26, H32, H34, H36, H38, the Aluminium Coil can be customized to meet specific requirements and suit different working conditions. Whether you need a softer material for easier forming or a harder alloy for increased strength, this product offers versatility and flexibility.
